README

About

Collection of R utility functions to generate the simulation results as described in 'Powering up: enhancing success rates in biomarker discovery & reproducibility: Sample Size Calculation for Feature Selection'.

Requirements

- R (tested on R >= 4.2.0)

Usage

- Create an "Illustration" directory in the project root.
- Copy the scripts NewMethod.R and SimFunctions.R into Illustration directory.
- See supplementary material 1 in 'Powering up: enhancing success rates in biomarker discovery & reproducibility: Sample Size Calculation for Feature Selection'
